FCC Commission:

I write to provide Comments to the FCC on the E-Rate NPRM, proceeding 13-184. The E-Rate has been of great importance to my district of Clinton Public School I-99 because it has helped our students and teachers gain access to a wealth of online resources, to communicate and collaborate, and to develop the 21st century skills necessary for college and career. However, E-Rate funding levels have not kept pace with my district's current bandwidth needs. We made a commitment to become a 1:1 iPad school last year and are now stranded in wifi limbo due to delays in funding. **This is creating huge frustrations for teachers, students, administrators and parents!** I urge you to consider raising the E-rate funding level to at least \$5 billion per year, which is close to the average demand level for each of the past two years.

As the educational technology director for Clinton Public Schools in Oklahoma, I know that seamlessly infusing digital learning throughout the school curriculum is a prerequisite for students to graduate from high school with the skills and knowledge they need to succeed in today's global economy. Access to high speed broadband is the key for modern teaching and learning to occur in all schools across the country.

In Clinton Public Schools we use digital learning to personalize learning, provide online classes, meet common core state standards, administer online assessments, and make data driven decisions etc. **Every student in our district has an iPad that is worthless without infrastructure upgrades needed for their operations, needs we had full confidence would be funded by erate this year!**

My district network is currently failing to keep up with demand, and the need for a high speed reliable network is only going to increase in the near future.

The E-rate program has been a phenomenal success in bringing Internet access to almost every classroom in America. In the last funding cycle applications from schools and libraries totaled more than \$5 billion, more than double the available funding. I respectfully urge the FCC to increase funding for the E-Rate program to at least \$5 billion to meet this demand. All students need access to high speed broadband. Our nation's future depends on their success.

Sincerely,

Beth Richert  
Director of Educational Technology  
Clinton Public Schools  
Clinton, OK 73601
